

STL isometric kit

Every printable part in cad/stl, drawn from the STL in millimetres. Orthographic cameras. Isometric is yaw 45 deg, pitch 35.264 deg. Hole pitch 25.4 mm. Strip body 25.4 * N by 101.6 mm, 4.0 mm thick. M3 screws from below into female-female standoffs.

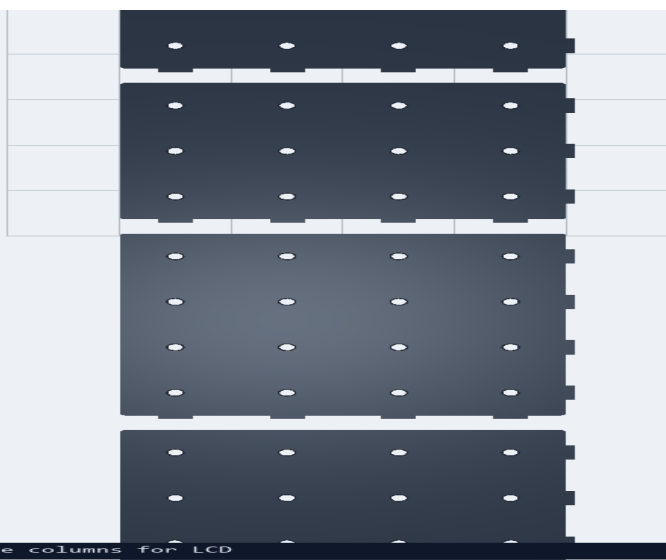

Base plates

Base plates 1x4 through 5x4
Bodies 25.4 mm * N wide, 101.6 mm long, 4.0 mm thick

gap 8 mm in this family view only assembled pitch is 25.4 mm with zero gap

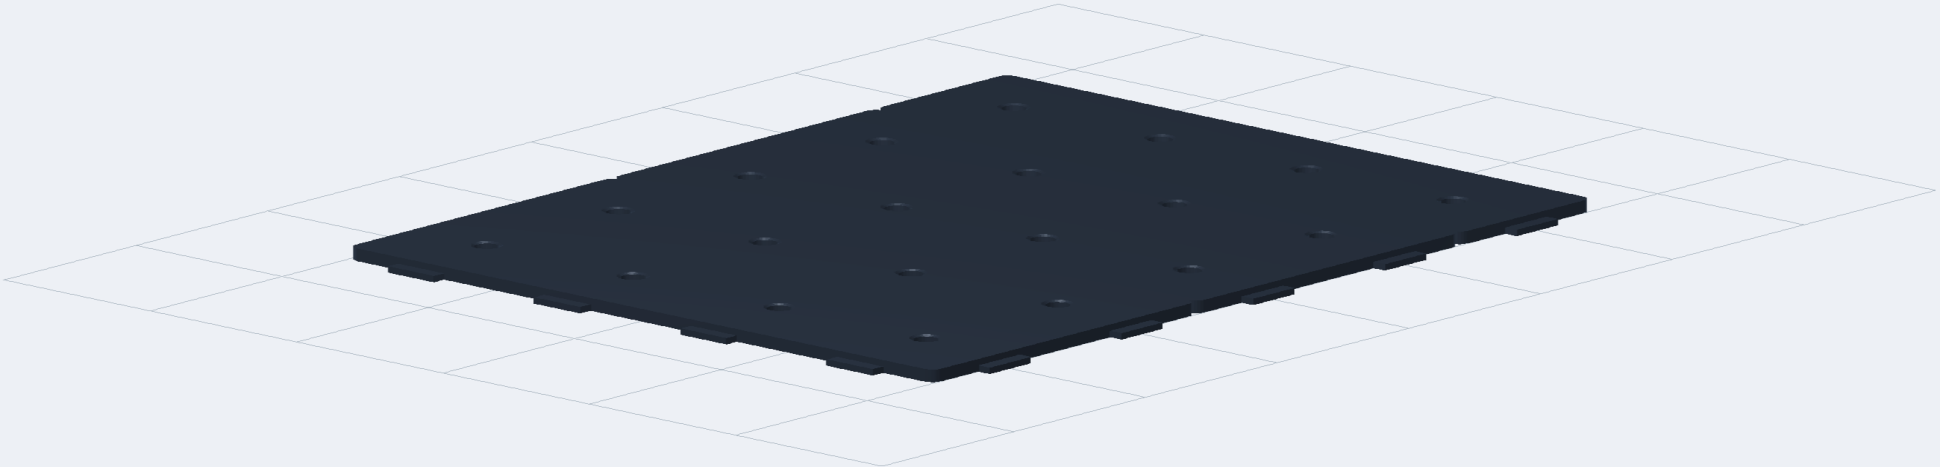

Base plates top orthographic
Hole centres on a 25.4 mm grid

1-wide = one hole column 5-wide = five hole columns for LCD

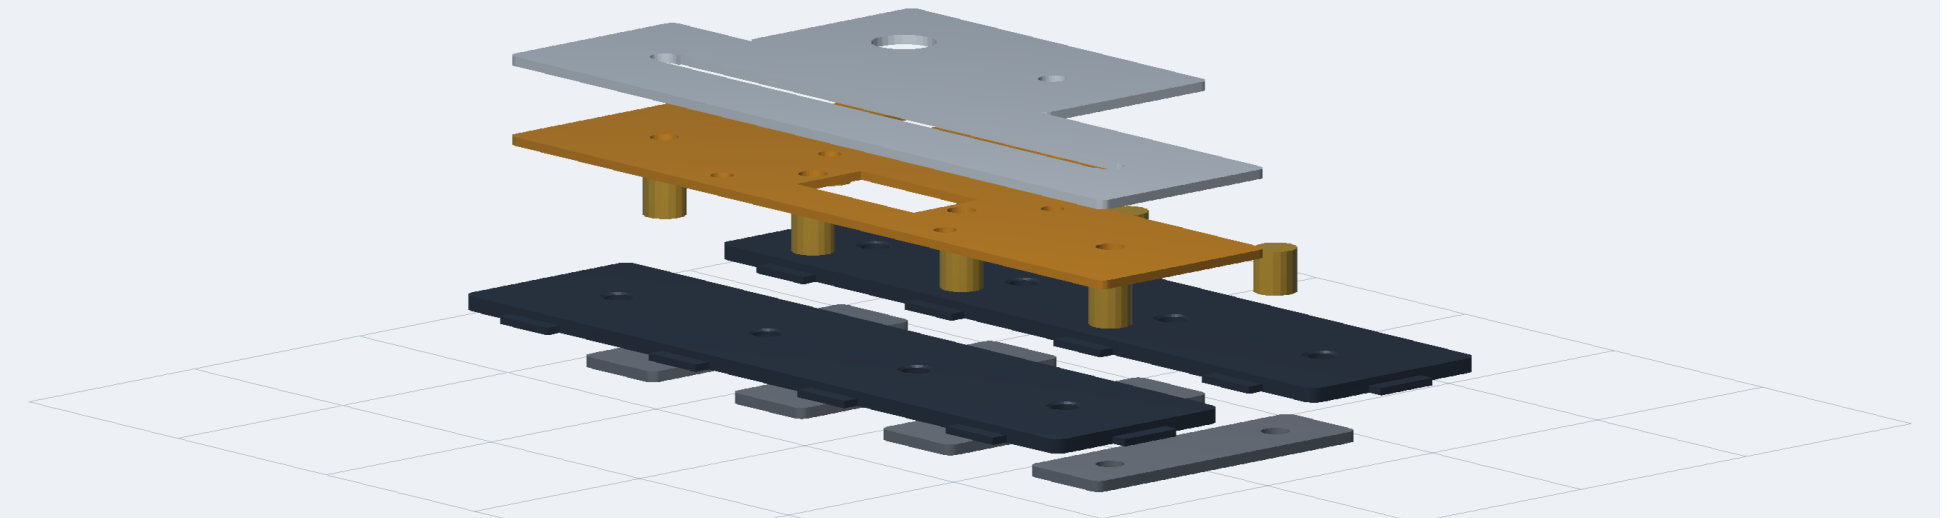

Assembled 5-wide base and exploded stack

Assembled base 5 units wide
1-wide + 2-wide + 2-wide pitch 25.4 mm length 101.6 mm

screws from below through join bars into standoffs on top

Exploded modular stack
join bar -> 1x4 strips -> M3 standoffs -> adapter -> faceplate

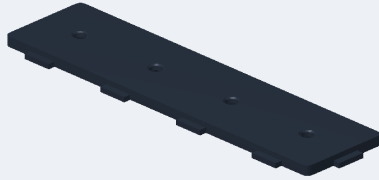

true millimetres strips pulled 14 mm apart in X, layers 18-22 mm in Z for the breakout

Exploded Z offsets are 18-22 mm so you can see each layer. X gap 14 mm between the two 1x4 strips is for the breakout only; the assembled pitch is 25.4 mm with tongues in grooves.
